

## PROVIDER CONTRACTS & REIMBURSEMENT RULES

# Smartchoice Contracts

Keep contract terms connected to claims.

Translate provider and facility payment arrangements into configurable administration rules. Smartchoice Contracts helps teams organise reimbursement methods, tariff schedules and effective dates in one environment.

### WHAT YOUR TEAM CAN DO

#### Flexible reimbursement methods

Configure per-day and variable per-day rates, case rates, fixed rates, percentages of billed charges and capitation arrangements.

#### Contract and tariff configuration

Associate one or more coverage groups with a contract and assign tariff schedules or payment methodologies.

#### Network and validity controls

Distinguish participating and non-participating contracts by business segment, and define effective dates, end dates and authorisation requirements.

#### Rules and review points

Apply qualifiers such as service setting, provider type and speciality. Route selected claims for manual review and configure submission periods.

#### How it connects

Supply payment methodology information to Smartchoice Claims or a connected claims platform. Align configured terms with the applicable provider agreements.

#### Configured for your environment

Agree local tariff content, network definitions and lawful claims submission rules. Network participation is not automatically designated service provider status. Contract drafting and electronic signature are outside the capabilities described here.

**Support consistent pricing by making agreed reimbursement arrangements easier to maintain.**
